PRODUCT DETAILS

A compact, stylish docking station with DAB digital radio, FM radio, and Bluetooth for wireless streaming, the Contour D1 has low power consumption while delivering impressively powerful, detailed sound. Its modern design matches almost any interior, and the artfully crafted rotating dock with clip adapter is suitable for new iPod, iPhone, and iPad models with Lightning connectors as well as older models with 30-pin connectors. Bluetooth - perfect for sharing... Share Contour D1 with your family and friends, whether they have an Apple device or not. With Bluetooth, you can wirelessly stream any audio file from truly any phone, tablet or laptop directly to the Contour D1 - no docking required. The DAB digital radio treats you to precise digital-quality sound, numerous stations (many of them only available digitally), scrolling text with track titles, program information, and much more. Digital radios automatically find all available stations and allow you to select by station name. In addition, this device offers FM reception from stations that have not yet switched to digital. Bring millions of recordings, thousands of radio stations and more to your Contour D1 with the Pure Connect app. Available for iOS and Android devices, the Pure Connect app opens up access to more than 20,000 Internet radio stations, over 8,000 on-demand radio shows and podcasts, and approximately 20 million tracks via subscription to the Pure Connect* music streaming service. Additional features: In addition to 20 W rms of powerful, detailed sound, the Contour D1 offers a slim remote control (with convenient magnetic mount), two adjustable alarm times, sleep timer and snooze function. There is an input for iPods or MP3 players that are not compatible with the docking station, stereo headphone jack and USB connector for product updates.
